Sophisticated color monitor provides security.

The JF series is the high performance, hands-free video intercom with a quality monitor and an amazingly slim design. It is easy to operate and requires a little time to install. The JF series offers a simple yet effective security solution.

Basic System (JF-1MD) & Enhanced System (JF-2MED) Common Features

- **Clear identification provided day and night!**

The Video Door Station automatically activates the built-in white LED illuminator in low light condition, and sends the clear color image to 3.5 inches TFT color LCD monitor. Color identification is always available even at night!

- **Both hands-free & press-to-talk communications are available.**

When a call comes in, press the TALK button to begin a hands-free conversation. In a noisy environment, Press-to-talk mode provides a clear conversation.

- **Transmit LED shows you the condition.**

Transmit LED lights when you talk, and goes off as you listen to a caller (or hear outside sounds).

- **3 types of Video Door Station are available.**

If you desire a Vandal Resistant Video Door Station, choose either the JF-DV or JF-DVF.

Vandal resistant,
Surface mount,
Zinc die casting,
Weather resistant

Plastic,
Weather resistant

*JF series Video Door Stations are compatible with JB series Inside Stations.

- **Entrance monitoring**

Enables you to monitor the area around the Door Station. Inside sound is not sent to the Door Station.

- **Option button**

Controls external device connected with optional connector, such as an entrance door light.

Not available for JF-1SD & JF-2SD.

Basic System

JF-1MD

Supports 1 Door Station and 1 or 2 Inside Stations.

Provides a simple security solution with basic features.

The basic system offers a simple security solution. It supports 1 Door Station and 1 or 2 Inside Stations (1 Master Station + 1 Sub Station). The Color Video Inside Station is only 27mm thick!

(*) Room-to-room communication is not available.

JBW-BA Long distance adaptor

- Extends wiring distance to video monitors from 100m up to 350m.

Use specified cable for JBW-BA.

- Ø1.0mm to Ø1.2mm
- Insulation: PE (polyethylene) (never PVC)

PS : Power supply PS-1820S, PS-1820UL, PS-1820, PS-1810DIN PT : AC transformer

Enhanced System JF-2MED

Supports up to **2 Door Stations** and **3 Inside Stations**.

Provides additional features for greater security and better communication.

Picture Memory

Voice Memo

Message for Entrance

Only 32mm

The enhanced system supports up to 2 Door Stations and 3 Inside Stations with the addition of these features: Picture Memory to record visitors, Voice Memo to leave messages at the inside monitor and Message for Entrance to record a message for visitors when speaking to them is not appropriate. All these features in a monitor that's only 32mm thick!

Picture Memory is available both manually & automatically.

If a call is received from Video Door Station, the unit starts recording automatically. You can also start recording by pressing the REC button manually.

Up to 50 pictures can be recorded.

A maximum length of approx. 8 seconds (8 shots) can be recorded with 1 picture and 1 shot for each second.

10 pictures can be saved.

Saved pictures are not overwritten.

8 shots / picture

Record

• Automatic Recording

Works anytime - even when you're away.

Starts recording when the CALL button on the Video Door Station is pressed.

• Manual Recording

Whenever you like!

Starts recording by pressing the REC button when monitoring or talking to the visitor.

Play

• **Plays 8 shots continuously so that you can see them as a moving image. Pausing and frame-by-frame playing are also available.**

Both the manual recording of visitors and the playback of recorded images can be controlled on Master and Sub Inside Stations.

Take advantage of the new Voice Memo feature to stay in touch with your family.

Easily record and playback a short message for a loved one or a reminder for yourself using the Voice Memo feature.

Up to 3 Voice Memos for internal use can be recorded (maximum of approx. 15 seconds / memo).

Outgoing messages can be recorded and sent out at the Door Station.

When you cannot or do not want to use your voice to answer a visitor for whatever reason, or when you want to answer a visitor with a specific recorded message, use this Message for Entrance function.

It allows you to record 2 outgoing messages. After identifying a visitor, you can choose to use either your voice or the recorded outgoing message to answer the visitor.

It is helpful for a person with speech defect, a foreigner who cannot speak the language of the country he/she lives in, and an elderly person or a woman who lives alone and does not want to be known he/she lives by himself/herself, etc.

2 messages can be recorded (maximum of approx. 10 seconds / message).

> Other Features

- **Select from five different display languages.**
Choose from English, French, German, Spanish and Dutch.
- **Room-to-room communication is available.**
- **Video signal (NTSC) can be output from Master Station.**
- **External sensor input is available.**
When an external sensor is activated, the Inside Station monitor shows a warning sign and a notification sound goes off. Also, a notification sound goes off on the Door Station 1 by setting.

- **External TALK switch connection (Footswitch)**

If you find it difficult pressing the TALK button for whatever reason, step on the optional footswitch to operate the TALK button.

- **Optional Audio Door Station at second entrance.**

Kit Boxes

- **JFS-2AED** : JF-2MED, JF-DA & power supply
- **JFS-2AEDV** : JF-2MED, JF-DV & power supply
- **JFS-2AEDF** : JF-2MED, JF-DVF & power supply

PS : Power supply PS-1820S, PS-1820UL, PS-1820, PS-1810DIN PT : AC transformer

CAMERA POSITION & IMAGE VIEW AREA

WIRING & CABLE

- Two-conductors Monitor to Door Wiring
- JF-1MD: Six-conductors Master to Sub Wiring
- JF-2MED: Four-conductors Monitor to Monitor Wiring
- Recommended: Parallel or jacketed 2-conductor, mid-capacitance, non-shielded cable. PVC jacket with PE (polyethylene) insulated conductor. Never use individual conductors, twisted pair cable or coaxial cable.

Hands-free communication is activated by automatic voice switching circuitry, which may cause intermittent audio by the environmental noise level of either inside stations.

The image on the monitor is simulated.
